Get into the groove

Groovy

Groovy is the latest modern and stylish design, from the mind of Josef Moskovic.

The faucet's curved silhouette and fluid grooves invite the eye to delve deeper into this intricate, harmonious design and engage the senses.

It's a unified composition between design and engineering – and with fine craftsmanship in every detail, each piece is an expression of cutting-edge innovation.

Groovy is cool and playful. Its meticulous design is a visual and tactile experience, and its gentle contours inspire luxury and relaxation.

Perfection
lives in the details

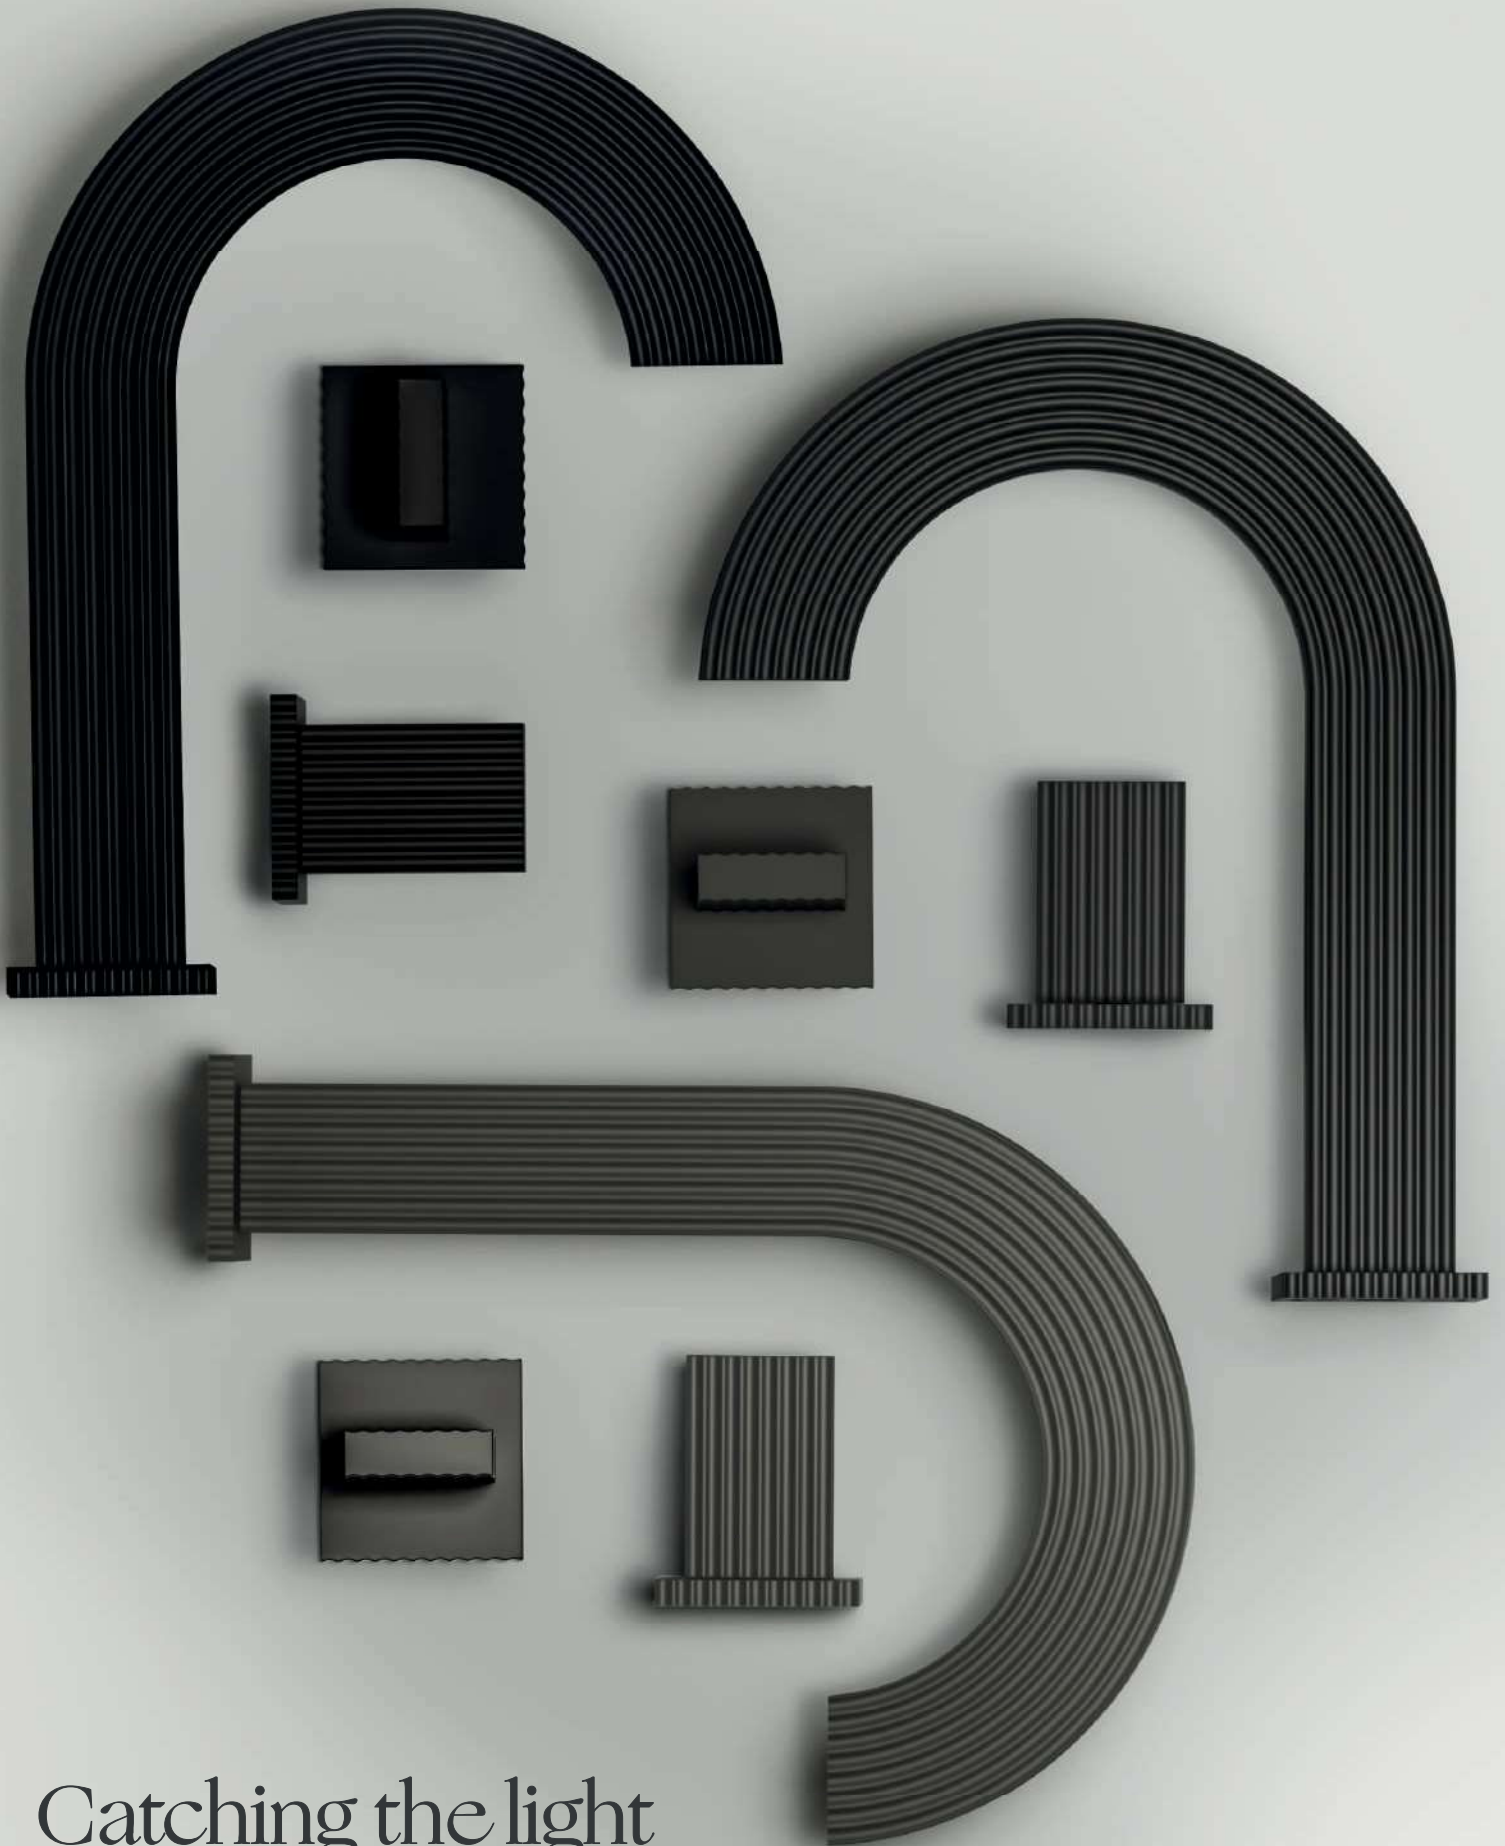

The revolution of precision

The Groovy collection is created by working the metal at a high rate of revolutions per minute -- giving it optimum quality in its cut. With the precision of hundredths of a millimeter in every detail, intricate grooves included, Groovy is always perfectly finished. The Groovy collection is the result of the most advanced technology and continuously delivers a graceful and meticulous elegance.

A subtle dance
between light,
its reflections
and your eye

Catching the light

Mate

With a subtle treatment of Groovy's surfaces, we were able to dim the metallic shine.

Our matte collection awakens the senses, combining the materiality of the environment with an object that plays with light in a distinctive and original way.

The uniqueness of light
reflected from different surfaces
